

Hydraulics Fundamentals and

Start Date: 8/14/2017 8:00 AM

End Date: 8/18/2017 5:00 PM

COURSE OBJECTIVES:

At the end of this course, the student should be able to:

1. Understand the hazards associated with Hydraulic Systems.
2. Identify hydraulic components along with the symbols that represent them in a hydraulic circuit diagram.
3. Build hydraulic circuits and set up operating parameters of the components in the circuit.
4. Safely and accurately troubleshoot hydraulic systems using a systematic approach.
